# 6K Series - 2 channel for 1.6mm wall tubing

Boxer Pumps > Products > Peristaltic Pump

6K peristaltic pump, 2 channel for 1.6 mm wall tubing with 24 V stepper motor .

Options:

- 1.6, 2.4 or 3.2 mm ID tubing
- 4 or 8 rollers
- complete with motor only or motor with choice of 3 pre-assembled drivers
- optical speed sensor

Note: separate datasheets provide details the 6K series for 1.0mm wall tubing, however 1.6 mm and 1.0 mm wall tubing can be combined on the same pump.

#### **Technical Data**

	Flow per Revolution
137 / 89 µl per revolution (4 / 8 rolle	ID Ø 1.6 mm
313 / 167 µl per revolution (4 / 8 rolle	ID Ø 2.4 mm
489 / 214 µl per revolution (4 / 8 rolle	ID Ø 3.2 mm
nmended speed)	Flow at 300 RPM (max recommended speed)
41.1 / 26.7 ml/min (4 / 8 rolle	ID Ø 1.6 mm
93.9 / 50.2 ml/min (4 / 8 rolle	ID Ø 2.4 mm
146.7 / 64.2 ml/min (4 / 8 rolle	ID Ø 3.2 mm
ng A4 driver) 17 to 24	Power Consumption (including A4 driver)
Pharm-a-line / Norprene G / ED-P	Tube Materials
	General Data
8 m H	Max pressure
8 m H	Max suction height (dry)
>10000 hc	Motor life
1280	Weight (without driver)
	Optional Sensor
4 pulses per revoluti	Optical speed sensor

All data measured with 'run-in' Pharm-a-line tubing and H<sub>2</sub>O.

### Inlet / Outlet Positions

The 6K peristaltic pump is extremely compact due to each channel running through either the left or right side of the rotor assembly. The inlet and outlets of each channel are above and below the pump head.

The inlet and outlet positions shown here are for a pump running in the clockwise direction. If the motor is run in the reverse direction, the inlet and outlet position of each channel also reverse.

Each channel is run by a common shaft and cannot be controlled individually.

Туре Size

Rated current	2.8 A
Resistance per phase	1.13 Ω ±10%
Inductance per phase	3.6 mH ±20%
Wire gauge	22 AWG
Lead length	300 mm
Available drivers	→ <u>Drivers</u>

Recommended driver rating

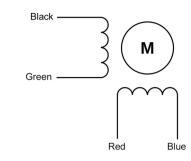

A current limiter should be used for low speed operation to avoid excessive motor temperatures

### **Optional Speed Sensor**

An optical sensor (shown in turquoise) is mounted inside the pump body and is interrupted by a 4 slot rotating disc (shown in purple). The optical sensor has 4 leads.

#### Assembly Information

The 6K peristaltic pump is assembled to a panel cut-out using 4 x M4 bolts. The rubber gasket should be placed between the motor plate and the panel.

Suggested panel cut-out:

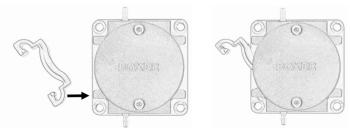

#### Tube Set Loading / Unloading

(1) Align the lower tube clip with the pump body in the orientation shown below. Push the lower tube clip into the recess in the pump body.

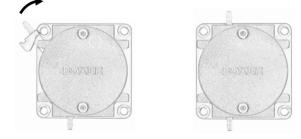

3 Align the saddle with the pump body in the orientation shown below. Insert the lower pin of the saddle into the recess in the pump body.

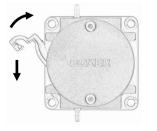

**5** Repeat steps 1 to 4 for the right hand side of the pump.

**2** Push the upper tube clip into the recess in the pump body. Some tension in the tube will be required as it is pulled over the rollers.

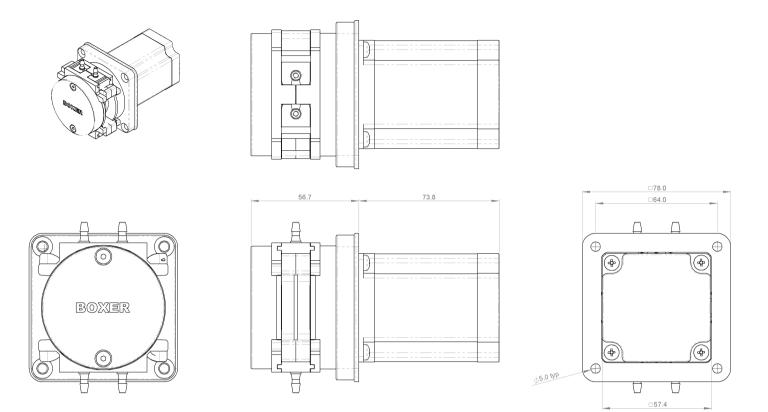

6 To unload the tube set follow steps 1 to 4 in the reverse order.

### Order Information

When ordering the 6K peristaltic pump the base pump, tube set and saddle kit should be ordered separately.

#### Part Number Description

Motor Only: 6341.100 6K 24 V Stepper / 4 Rollers 6331.100 6K 24 V Stepper / 8 Rollers With A4 Driver: 6341.101 6K 24 V Stepper / 4 Rollers / A4 6331.101 6K 24 V Stepper / 8 Rollers / A4p With A4p Driver: 6341.151 6K 24 V Stepper / 4 Rollers / A4 6K 24 V Stepper / 8 Rollers / A4p 6331.151 With iD Driver: 6341.105 6K 24 V Stepper / 4 Rollers / iD 6331.105 6K 24 V Stepper / 8 Rollers / iD

#### **3** Saddle Kit

Part Number Description

6000.164	Saddle Kit / 1.6 mm wall tubing / 4
rollers	
6000.168	Saddle Kit / 1.6 mm wall tubing / 8
